Education	
Johns Hopkins University	Baltimore, MD
Master of Science in Computer Science	Expected May 2024
☐ Courses: Software Define Networks, Introduction to Human-Computer In	nteraction, Computer Vision, Deep Learning
Nanjing University	Nanjing, CN
Research Assistant in Computer Network and Systems	Jan 2021 – Nov 2022
☐ Courses: Distributed Networks, Introduction to Computation Theory, Dis	stributed System (GPA: 3.80/4.00)
Xi'an Jiaotong University	Xi'an, CN
Bachelor of Engineer in Computer Science and Technology (Honors Science Progr	
☐ GPA: 3.47/4.00 (Honor Graduates, top 10)	,
☐ Courses: Operating Systems, Software Defined Networking, Data Structu	ures, Analysis of Algorithms, Artificial Intelligence,
Machine Learning, Computer Networking, Computer Vision	
Research Experiences	
Service-Oriented Network Stack and Architecture Development	University of California - Berkeley, Berkeley, CA
Researcher (Supervised by Prof. Scott Shenker)	May 2023 – Jan 2024
☐ Build new services for the new network architecture, majorly related to II	·
☐ Build a service module related to Pub/Sub on a real cloud environment ar	
Automatic Failure-Detecting System Development for Distributed Systems	University of Michigan, Ann Arbor, MI
Researcher (Supervised by Prof. Ryan Huang and Prof. Chang Lou (UVA))	Jan 2023 – Jan 2024
☐ Analyze popular distributed systems (HBASE, Zookeeper, etc.) to find po	
Design and perform major implementation and evaluation of a system to	=
systems during runtime and analyze against baseline failure detectors	,
☐ Achieve a faster and more accurate detection of failures in distributed sys	stems compared to multiple baseline checkers
☐ Prepare paper to be submitted to future OSDI/SOSP conference	1
In-network Bandwidth Quality-of-Service System Development	Nanjing University, Nanjing, CN
Lead Developer (Supervised by Prof. Chen Tian)	Nov 2020 – Jun 2022
☐ Created 3000+ line projects with NS-3 network simulator and programma	
☐ Designed and developed a network bandwidth allocation system based on	
load scheduling time in-between networks and to achieve multiple application strategies	
☐ Achieved bandwidth utilization rate of 80% with high stability compared to 50% in previous systems	
☐ Completed most programming tasks that contributed to research and a programming tasks.	
Norma: A High-Performance Network Tester Based on Programmable Switch	
Developer (Supervised by Prof. Chen Tian; Collaborated with Alibaba, China)	Nov 2021 – Jan 2022
Developed customizable and light-weight in-network performance testing tool by utilizing P4 language for switch hardware	
programming and C++ for control plan software programming	
Evaluated the system architecture, designed and implemented controlled experiments for the research group	
☐ Ensured testing tool performance under high-speed and extreme testing environments, with high testing accuracy of around	
95.5% compared to the previous result of approximately 50%, paper accepted by NSDI 2023	
Runtime incremental networking data plane verification Project	Xi'an Jiaotong University, Xi'an, CN
Research Intern (Supervised by Prof. Peng Zhang and Prof. Hao Li)	Sep 2020 – May 2021
☐ Applied the network verification tool "batfish" on network environments	*
☐ Learned Differential Datalog and Soufflé (a logic programming language) and participated in developing some parts of the	
incremental network verification functions and testing (related to the BGP and OSPF routing)	
Teaching & Mentoring Experiences	
Computer Networks	Nanjing University, Nanjing, CN
Teaching Assistant	Feb 2022 – May 2022
☐ Prepared lectures, lab sessions on SDN, and programmable network topic	
☐ Hosted several office hours for students on assignment and exam revise	
☐ Participated in the design and graded course assessments to ensure students understood materials and stayed on track	
Honors	
☐ Honorary Graduate: Qualified by graduating with honors and ranking 10 ^t	th among the Computer Science and Technology majors
at Xi'an Jiaotong University, Xi'an, China	
<u>Publications</u>	
☐ Yanqing Chen, Bingchuan Tian, Chen Tian, Li Dai, Yu Zhou, Mengjing Ma, Ming Tang, Hao Zheng, Zhewen Yang , Guihai	
Chen, et al. Norma: Towards practical network load testing. In 20th USENIX Symposium on Networked Systems Design and

Implementation (NSDI 23), pages 1733–1749, 2023.

cloud. arXiv preprint arXiv:2305.02560, 2023.

Conference Presentations

Yang, Z. (2023, April 19). *Norma: Towards Practical Network Load Testing* [Conference presentation]. 20th USENIX Symposium on Networked Systems Design and Implementation (NSDI 23), BOSTON, MA, USA

Professional Experiences

Baidu, Inc.

Software Developer Intern

□ Designed and developed end-to-end solutions, including site acceleration, continuous delivery, capacity management, elastic computing, failure analysis, traffic distribution, and performance tuning

□ Designed programs of 500+ lines using C++ and Java to conduct maintenance of the Baidu Voice Assistant system and network during the Chinese New Year peak network usage period, and reduced error rate by 10%-20%

□ Pitched the program to the company and successfully incorporated it into DuerOs, a popular smart home appliance

Research Interests & Skills

Research interests: Networking and Network systems, Distributed systems, Storage systems

Technical Skills: Languages: C++ (Advanced), Python (Advanced), C (Advanced), SQL (Advanced), Bash (Intermediate),

R (Intermediate), P4 (Intermediate), JAVA (Basic), Go (Basic), Swift (Basic), Rust (Learning)

Frameworks: Scikit, PyTorch, TensorFlow, Keras, Django, Flask, NodeJS **Tools:** GIT, MySQL, NS3 Network Simulator, Kubernetes, Docker
